GENERAL RECOMMENDATIONS

1. Feed newborn calves 3 quarts of high quality warm colostrum via nipple bottle within 1 hour of birth and repeat 12 hours later (or) feed 4 quarts of high quality warm colostrum by esophageal feeder within 1 hour of birth and repeat 12 hours later via nipple bottle offering as much as they will consume.
2. Consult with your veterinarian on a dry cow and calf vaccination program including but not limited to E. Coli, rota and corona virus, clostridium and salmonella.
3. Begin feeding milk replacer on day 2 and provide fresh, clean water continuously on a free-choice basis.
4. Begin feeding a calf starter recommended for intensive feeding at two days of age and offer continuously on a free-choice basis.
5. At the start of weaning, transition calves from twice per day feeding to once per day feeding. This will encourage the calf to eat more calf starter and assures an effective weaning.
6. Wean only if calf is eating at least 3 lbs of calf starter for 3 consecutive days.
7. Continue to feed appropriate full potential calf starter up to 12 weeks of age.
8. Begin feeding a calf grower recommended for full potential feeding at 12 weeks of age at the recommended rate.

FULL POTENTIAL CALF FEEDING AND MANAGEMENT PROGRAM

Cow's Match calf milk replacer should be fed along with a specific calf starter designed for full potential feeding. Calf to calf variations such as calf weight and health must be considered in implementing this program. Consult with your feed specialist for specific feeding and management recommendations to match with your calf performance goals and expectations. .

MIXING AND FEEDING DIRECTIONS

USE ONLY LOW SODIUM (<50 ppm) water for mixing and feeding! Powder should be weighed for precision and best calf performance.

5 Gallon Mix: While stirring, mix 6.25 lbs of milk replacer powder in 110-120° F water and bring final solution to 5 gallons. Feed according to table below.

Individual Calf (Large Breeds)120 to 165 lb body weight)

NOTE: ALWAYS offer free choice LOW SODIUM (<50 ppm) water. While stirring, pour milk replacer powder into 110-120° F water and bring to final solution. Mix thoroughly and feed as directed.

	Milk Replacer Powder	Final Solution	Feeding*
Week 1	0.94 lbs	3 quarts	2x daily
Week 2 **	1.25 lbs	4 quarts	2x daily

to Weaning

Weak of Weaning 1.25 lbs 4 quarts 1x daily
Wean only if calf is eating at least 3 lbs of calf starter for 3 consecutive days.

* For 3x feeding use 2/3 the amount of powder and solution indicated.

** When under heat or other types of stress, delay this increase until week 3.

This product was made in a manufacturing facility that does not handle or store products containing animal proteins prohibited in ruminant feeds.

Store in a cool, dry location. Do not double stack pallets of milk replacer.
