Vitamin E, I.U./lb, (Min).....	150

FEEDING AND MANAGEMENT INSTRUCTIONS:

Feed this product free choice to cattle receiving rations composed largely of grass hay or to cattle grazing range or grass pastures. Optimum intake is 4 ounces per head daily.

CAUTION:

Store in a dry, well-ventilated area protected from rodents and insects. Do not feed moldy or insect-infested feed to animals as it may cause illness, performance loss or death.

INGREDIENTS

Note: ingredients differ by manufacturing plant

Dicalcium Phosphate, Monocalcium Phosphate, Processed Grain By-Products, Salt, Calcium Carbonate, Magnesium Oxide, Molasses Products, Potassium Chloride, Manganous Oxide, Zinc Sulfate, Colored with Iron Oxide, Basic Copper Chloride, Vitamin E Supplement, Vitamin A Supplement, Cobalt Carbonate, Vitamin D3 Supplement, Manganese Sulfate, Sodium Selenite, Ethylenediamine Dihydroiodide

IMPORTANT:

This product is to be fed only to the animal species as directed on this label. Follow these management practices:

1. Cattle receiving phosphorus deficient diets may over-consume this product when it is first offered.
2. Place the mineral feeder near the water supply or in the animals' loafing area.
3. Put out fresh mineral at least once per week.
4. Feeding free choice salt is not required with this mineral.
5. Provide fresh, clean water near the feeding area.

USAGE TIPS:

RangeLand® Pro Mineral 12 is recommended for free-choice feeding to cattle which are receiving rations composed largely of grass hay or for cattle grazing range or grass pastures. Optimum intake is 4 ounces/head/day.

Cattle, which have been receiving phosphorus-deficient diets, may over-consume RangeLand® Pro Mineral 12 when it is first offered. During the first 5 to 7 days of free choice feeding, limit the intake to 1 lb. for each 5 to 8 head per day.

To help assure adequate mineral consumption, place the mineral feeder near the water supply or at the animals' loafing area.

Remove all other free-choice salt and mineral products. Put out fresh mineral at least once each week. An upright covered mineral feeder is best to use for protection of the mineral from weather.
