

WIND & RAIN® ALL SEASON 4 AVAILA® 4 MINERAL TUB

Specie: Beef

Type of Feed: Supplement

Form of Feed: Tub

General Description:

Beef cattle minerals in a cooked molasses tub that is designed to correct the mineral deficiencies of the available forage in a highly palatable, weather-resistant form. This line of minerals is designed for cow/calf and seedstock operators that need a free-choice mineral supplement to assure that their cattle are getting the proper levels and ratios of all of the 14 essential minerals cattle need for health, growth, and reproduction. Wind and Rain® Mineral Tubs provide these benefits in cooked molasses formulas packaged in a non-returnable plastic tub. This gives the producer a mineral that is the ultimate in weather resistance, palatability and consistent consumption, all in its own mineral feeder.

INGREDIENTS

Note: ingredients differ by manufacturing plant

Beet Molasses, Molasses, Dicalcium Phosphate, Monocalcium Phosphate, Calcium Carbonate, Soybean Oil, Dehulled Sunflower Meal, Magnesium Oxide, Sodium Hydroxide, Sodium Selenite, Ethylenediamine Dihydroiodide, Zinc Amino Acid Complex, Manganese Amino Acid Complex, Copper Amino Acid Complex, Cobalt Glucoheptonate, Vitamin D3 Supplement, Ground Rice Hulls, Vitamin E Supplement, Vitamin A Supplement.

FEEDING DIRECTIONS:

Feed one tub per 25-30 head of cattle and at least 2 tubs per pasture to ensure adequate intake by younger, timid animals.

Place the tubs within 100 feet of where animals congregate (loafing, grazing, feeding and watering areas)

Feed tubs continuously along with plentiful sources of forage and fresh, clean water.

Cattle will consume approximately 1/4 to 1/2 pound of this supplement per head daily.

If additional mineral and vitamin fortification is needed, provide a nutritionally balanced mineral/vitamin supplement containing salt.

This product does not contain added salt; therefore supplemental salt should be offered at all times.

CAUTION:

Store in a dry, well-ventilated area protected from rodents and insects. Do not feed moldy or insect-infested feed to animals as it may cause illness, performance loss or death.

Follow label directions. Feeding added selenium at levels in excess of 0.3 ppm in total diet is prohibited.

IMPORTANT:

This product is to be fed only to the animal species as directed on this label. Follow these management practices:

1. Placement of tubs can influence grazing distribution in large pasture situations. Place tubs in areas of under-utilization in order to entice animals to specific locations within a pasture.
2. Do NOT provide starved animals free access to this supplement.
3. Consumption rate depends on location of the tubs with respect to loafing, grazing, feeding and/or watering areas. Also consider animal condition, forage quality and quantity, in addition to seasonal weather conditions.
4. If over-consumption occurs for more than two weeks despite tub repositioning, remove tubs and evaluate the overall feeding program.

USAGE TIPS:

BREEDING CATTLE: This tube provides a free-choice mineral delivery system that reduces producer costs associated with labor and equipment. This mineral supplement has the flexibility to provide partial to complete supplementation of minerals and vitamins, based upon animal requirements. This is achieved through proper management of tub intake which will range from 1/4 to 1/2 lb./hd./day.

RECEIVING AND STARTING SUPPLEMENT: Offer Wind and Rain® All-Season 4 Mineral Tub with Availa® 4 to newly received calves or starting cattle, either in confinement or on pasture. Tubs should be offered through the first 3 to 4 weeks to newly received calves. Intake will range from 1/4 to 1/2 lb./hd./day.

KEY POINTS:

- Addresses mineral deficiencies of the available forage in a highly palatable, weather-resistant form.
- Wind and Rain® Mineral Tubs have the flexibility to provide partial to complete supplementation of minerals and vitamins, based upon animal requirements.
- The producer receives a mineral tub that is the ultimate in weather resistance, palatability and consistent consumption, all in a free-choice mineral delivery system that reduces costs associated with labor and equipment.
