

VFD-Required

WIND & RAIN® STORM® ALL SEASON 7.5 COMPLETE AU5600 ALTOSID®

**Specie:** Beef**Type of Feed:** Mineral**Form of Feed:** Granules**General Description:**

Beef cattle minerals designed to correct mineral deficiencies of the available forage in a highly, palatable, weather-resistant, granular formula that includes Wind and Rain® Fly Control with Altosid® (IGR) for the prevention of breeding of horn flies in the manure of treated cattle. Wind and Rain® STORM® cattle minerals' large particle size and special formulation keeps the mineral from absorbing water and blowing out of the feeder.

INGREDIENTS**Note: ingredients differ by manufacturing plant**

Calcium Carbonate, Salt, Dicalcium Phosphate, Monocalcium Phosphate, Processed Grain By-Products, Plant Protein Products, Vegetable Fat, Potassium Chloride, Magnesium Oxide, Sodium Selenite, Molasses Products, Mineral Oil, Lignin Sulfonate Colored with Iron Oxide, Vitamin E Supplement, Vitamin D3 Supplement, Vitamin A Supplement, Natural and Artificial Flavors, Ethoxyquin (a Preservative), Manganese Sulfate, Zinc Sulfate, Basic Copper Chloride, Ethylenediamine Dihydroiodide, Cobalt Carbonate.

FEEDING AND MANAGEMENT INSTRUCTIONS:

Hand feed daily to provide Chlortetracycline at the rate of 0.5 mg/pound of body weight daily in beef cattle over 700 pounds and to provide 22.7 to 45.4 mg S-Methoprene per 100 lbs. body weight/month (0.756 to 1.51 mg S-Methoprene/100 lbs. body weight/day). 0.25 pounds (4 oz.) per day of this product will medicate one 1400 pound animal.

When used as directed, this product will provide sufficient S-Methoprene insect growth regulator to prevent the emergence of adult horn flies from manure of treated cattle. Existing adult horn flies will not be affected. Start feeding before horn flies appear and continue until cold weather marks the end of the horn fly season. Introduction of this product after an adult horn fly infestation is established will require treatment of cattle with adulticides if immediate elimination of the adult fly population is desired.

WARNING:

A withdrawal period has not been established for this product in pre-ruminating calves. Do not use in calves to be processed for veal.

IMPORTANT:

This product is to be fed only to the animal species as directed on this label. Follow these management practices:

1. Cattle receiving phosphorus deficient diets should be monitored for the first few days to limit intake to the appropriate amount of Chlortetracycline as indicated in the feeding directions.
2. Place the mineral feeder near the water supply or in the animals' loafing area.
3. Feeding free choice salt is not required with this mineral.
4. Provide fresh, clean water near the feeding area.
